BCS v6.20
Feb 9, 2011

Find button

- resultant list now shows two buttons for each contact
  - *Log*
    - invokes the Log dialogue
  - *E-Mail*
    - launches Outlook with the contact's e-mail address in the To line

Phone List

- Contacts tab
  - *groups* button
    - if *Do Not Send* is checked, the user is prompted if all of the company's contacts should be flagged as *Do Not Send*
      - note that this only pertains to the current set of contacts for that company; if a new contact is added, they will **not** be assumed to have *Do Not Send* status

- Mailers tab
  - new *View* button

Estimates

- bug fix: When entering the Estimates module, if the currently displayed estimate was locked, the user would have to click on the Select Estimate dropdown to unlock that field, rather than just being allowed to type directly into the field. Similarly, after navigating to any locked estimate, the Select Estimate dropdown would only become unlocked if the user clicked in it.

Purchase Orders

- Shipment Details tab
  - if the *Supplier Invoice No* entered by user is the same as that on another purchase order, a warning message is displayed (the user is not prevented from doing this, just warned)

Reports

Phone List
- Company by Alphabet (#47)
  - new column showing agency #
  - removed column showing contact #
- Sales Activity by Customer (#257)
  - bug fix: running report no longer results in an error message

Job
- Master Project Invoice (#98)
  - "G.S.T. #" has been replaced with "H.S.T. #", unless date range start is prior to July 1, 2010
  - if "All Dates" option is chosen, the default is now to use HST rather than GST/PST
- Master Project Invoice 2 (#178)

- "G.S.T. #" has been replaced with "H.S.T. #", unless date range start is prior to July 1, 2010
- if "All Dates" option is chosen, the default is now to use HST rather than GST/PST

Time Sheet
- Daily Summary and Logs (#230)
  - employee event types that appear in the Log section of the report are now those with the field *Report #230* checked in the Employee Event Types lookup table

Administration

Company Info
- new tab: *Administrators*
  - shows all active employees with access to the Administration module in BCS
  - e-mail button launches Outlook with all of these employees listed in the To line

Validation Tables
- Phone List
  - Mailers
    - new radio buttons to view active mailers, all mailers or those satisfying a keyword search
- Employee
  - Event Types
    - new column: *Report #230?*; allows user to flag specific event types to appear on report #230

File Linking Methodology Replaced

Because of conflict issues with the current version of Adobe Reader, linking to PDF files using one specific form of linking technique is now no longer possible. In the following instances, the old form of linking has been replaced with a new form. Note that where the old form of linking had been used, those linked files still exist and can still be launched.

- Phone List > Products tab > *View Manuals* button
- Administration > Employees > Files tab
- Administration > Validation Tables > Phone List tab > *Mailers* button
- Administration > Inventory > Inventory Numbers > *Descriptions* button

---

BCS v6.10b
Jan 27, 2011

Reports

Employee
- Employee Date Log Details (#105)
  - bug fix: log entries with very large comments sometimes caused the report to hang; this has been corrected

---

BCS v6.10a
Jan 12, 2011

Reports

- e-mail button
  - bug fix: e-mailing internal reports (as opposed to estimates, quotes, invoices, service orders, purchase orders) sometimes worked but usually didn't

Jobs
- CO-TRAC Area Report (#145)
  - bug fix: no longer prompts for Misc Info
